SUMMARY

I am a B.Tech student specializing in Computer Science with a focus on software engineering and cybersecurity. My experience includes leading innovative projects in hackathons and participating in conferences, where I network with industry professionals. I'm passionate about applying my technical skills in real-world applications, showcasing strong communication and leadership abilities in collaborative environments

EXPERIENCE

Member 01/2023 - 01/1970
Computer Technological Centre, Karunya Institute Karunya Institute, India

College's innovation wing focusing on software and technological development

- Contributed to multiple software and tech-based projects for the college's innovation wing
- Worked collaboratively with peers and faculty on institutional software solutions

Probationary Member 02/2025 - 01/1970
IAESTE-LC Karunya Karunya Institute, India

International organization for promoting internships and exchange programs

- Cleared a competitive 3-stage selection process: written exam, group discussion, and interview
- Gained exposure to corporate work ethics, professional communication, and document formatting
- Designed pamphlets and supported PR campaigns to promote organizational activities
- Assisted in managing international exchange programs and hosting foreign interns

Team Lead (KINSHI-Finalist) 04/2025 - 01/1970
Cyberthon 2025, Kumaraguru College of Technology Kumaraguru College of Technology, India

National level cybersecurity hackathon

- Led a project on a narcotics website takeover system at a national cybersecurity hackathon
- Gained hands-on experience in offensive security and web exploitation techniques
- Received appreciation from judges and NTRO officials for innovation as a first-year participant
- Built strong networks with senior cybersecurity peers, freelancers, and event mentors

Participant 02/2025 - 02/2025
NAFED08 – Vikram Sarabhai Space Centre (ISRO), IIT Hyderabad Hyderabad, India

Expert-led conference focusing on quantum coding and data analytics

- Attended expert-led sessions on quantum coding for data analytics and futuristic technologies
- Gained insights into emerging tech trends and innovation strategies through high-level discussions
- Networked with leading scientists, scholars, and technology heads from ISRO and IITs

EDUCATION

B.Tech in Computer Science 01/2024 - 05/2028
Karunya Institute of Technology and Sciences Coimbatore

KEY ACHIEVEMENTS

🔹 Cyberthon Finalist Lead
Led team to Cyberthon 2025 finalist, securing 90% project completion.

🔹 Automated Chemist System
Successfully developed system to automate 75% drug orders for chemists.

🔹 Website Takeover Impact
Managed tool to detect and takeover 50 illicit websites at event.

🔹 Competitive IAESTE Success
Cleared IAESTE-LC selection with top 10% written exam score.

SKILLS

Visual Studio Code · Gmail

PROJECTS

Narcotic Website Takeover Tool
01/2025 - 01/1970 NA
Cybersecurity tool project targeting illicit narcotic websites

- Developed a cybersecurity tool aimed at detecting and taking over illicit narcotic websites
- Showcased the tool in a hackathon under your leadership

Medical Chemist Alert & Auto-Ordering System
01/2025 - 01/1970 NA
A system for managing stock and orders for medical chemists

- Designed and coded a system to notify chemists about low-stock medicines and automate order placement
